Robust Passive Sonar

Briefing to Industry

27 October 2000

- **Objective:** To enable interested contractors to propose the best possible program plans for the Robust Passive Sonar program
- **Caveat:** Every effort has been made to maintain consistency between Industry Day materials and the anticipated Broad Agency Announcement (BAA). In any instances where they differ, the BAA (when released) will take precedence
- **Questions:** All questions must be submitted in writing. Answers will be posted to the RPS Industry Day web site.
